NEW: KIDS WATERPARK PLAYA

The name Playa emphasises the water fun that children can experience in the new section of approx. 1,000 m². A large water climbing frame is coming with a 'tipping bucket' and various items of playground equipment. The 'Triple Slide', 'Duo Racer' and 'Body Cone' are water slides especially for children from 4 to 12 years old. For children from years old, a heated paddling pool is being built at Playa, where they can have fun with their parents. The official opening of Playa is expected to take place in mid-2017.

DUINRELL FACTS AND FIGURES

DUINRELL'S ORIGIN

The story of the Duinrell Estate is also the story of the Dutch coastal dunes. The elongated sand dunes, or high water lines, were formed by the tides of the sea and the Rhine. Behind these, to the west, the higher and younger dunes formed. This was the beginning of what is now one of the most popular recreational and nature areas in the Netherlands.

The Wassenaar beach and dune area is located in the direct vicinity of Duinrell and attracts day-trippers in search of peace, quiet and long walks. What are now called the inner dunes were in Roman times simply called the dunes. The present Duinrell recreational area is situated on the fourth high water line, which formed in about 500 BC; the fifth high-water line is now the first line of dunes that faces the sea. When ancient foundations were excavated, it was ascertained that in the distant past, on the spot where castle Duinrell stood, there had once been a delightful garden, and a farmstead close by.

Water catchment

The beautiful dune landscape in and around Duinrell is an important drinking water catchment area for the Randstad conurbation. However, this same water catchment programme, which was initiated by the national government in The Hague in the first half of the 20th century, marked the demise of what was then the Duinrell farm. By 1929, the surrounding meadows had become so dry that the estate lost its agricultural function. Happily, the trees proved to be more drought-resistant and the beautiful woodlands remained intact. The lake next to the castle also continued to receive sufficient water. Previously, Duinrell castle had a succession of owners with interesting names such as "De Jonge van Ellemeet," "Van Boetzelaer" and "Van Pallandt."
